

Kære dommere under DSF

Vedhæftet finder I den reviderede version af IPF's tekniske reglement pr. 31.12.19.

I bedes især bemærke de med rødt markerede tekster. Særskilt gør jeg opmærksom på, at der under fejlkortene er sket den ændring, at "dobbeltspring" i squat er flyttet op under blå farve og således ikke længere skal have gul fejlfarve. **Dobbeltspring eller mere end et forsøg på at komme op fra nederste stilling og enhver nedadgående bevægelse under selve løftet.**

Som formand for det nordiske styrkeløft forbund har jeg haft en korrespondance med Hannie Smith. Herunder findes hans svar på spørgsmålene om Erector Suit og indvejningsreglerne.

Endelig agter IPF ikke ved internationale konkurrencer altid at begynde udstyrskontrollen en halv time før indvejningen, men det er OK, at de nationale forbund fortsætter denne praksis, og dette vil vi fortsætte med i Danmark.

Med venlig hilsen

Klaus Brostrøm

2020/01/17

Dear Klaus Broström
President of the NPF

Our President ask me to send this Official letter and this will be final aswer after consulting by email with all the EC & TC members.

1. Which model of Erector Shirt is allowed? If it is all models, just add "all " to the approved list.

Every answer we received is in agreement that it must be clear if the Erector shirt can be worn and for what disipline. Unfortunately can't the contract between Inzer & IPF be ignored and must be respected until the end of 2022. The Approved list is ammended as follow.

Erector Shirt – No Sleeves Equipped only
Heavy Duty Erector Shirt - Sleeves Equipped only

2. How shell we manage and fulfil the new weigh-in rule from 2019? See letter below

It clear that the Referees should follow the rules as it stands in the TC Rules. The feedback we received unamously is that this particular sentence in the rule need to be removed at the Congress of 2020. Sometimes if difficult to follow this to the book because of circumstances beyond the athletes control. For example when the bus didn't run on time or broke down like in Dubai, the lifters should not be penalize. That is not sensible. The Referees need to be more flexible.

Lifter spend a lot of money to travel to World Championships to be refused at weigh-in when they late after the first round is done. The IPF don't want to end up with a Law suit because a lifter is refused at weigh-in.

Kind Regards

Hannie Smith

TC Chairman-IPF
